

# Finding Your Browser's Developer Console

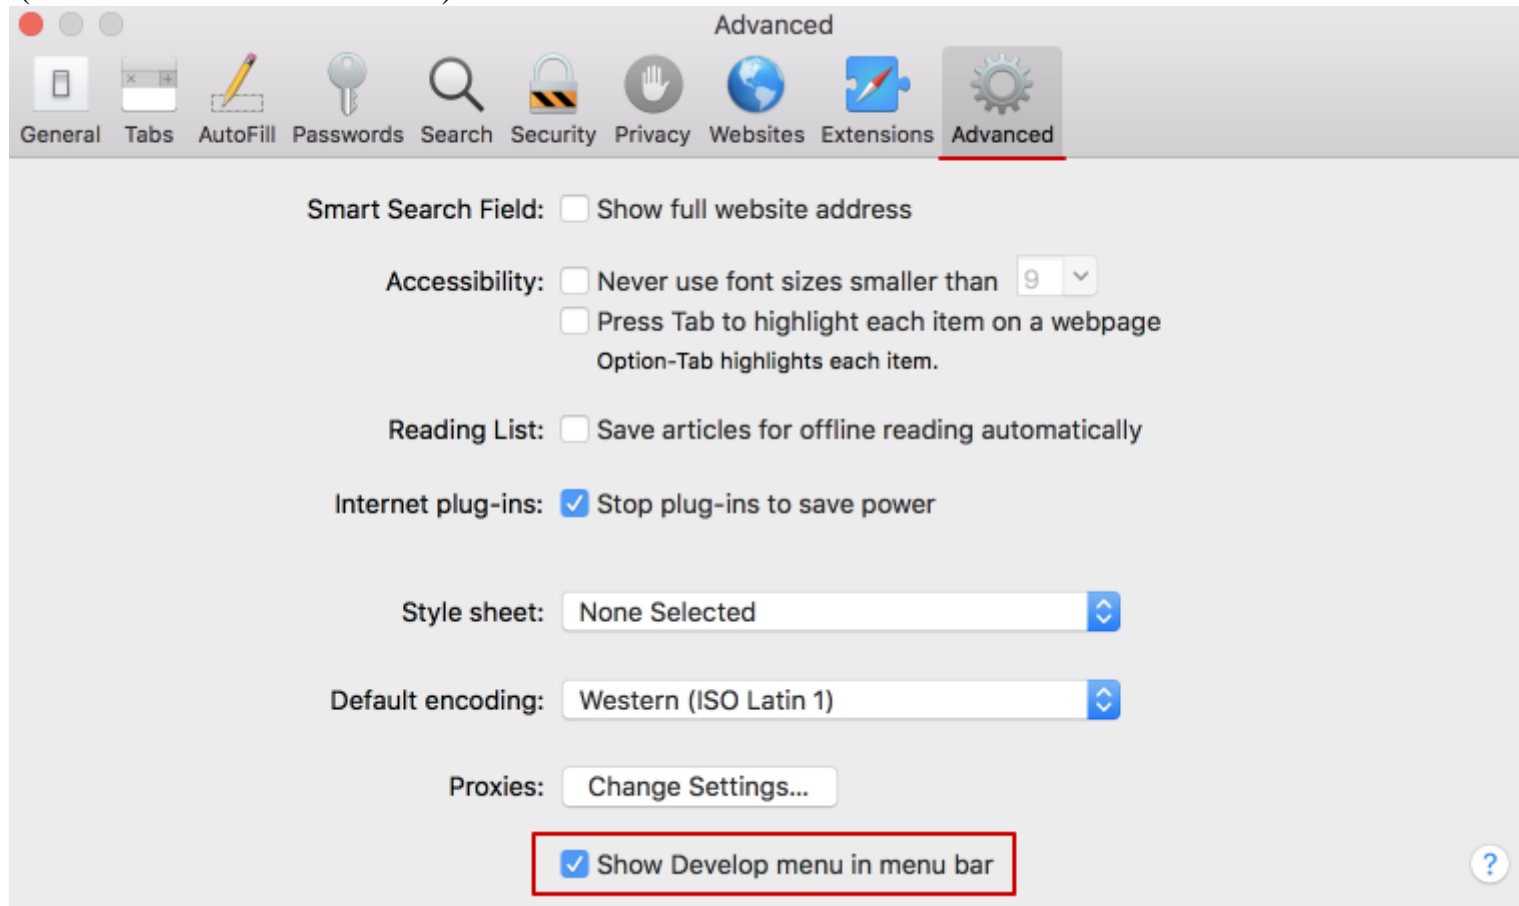

---

Here is how to find it on most modern browsers.

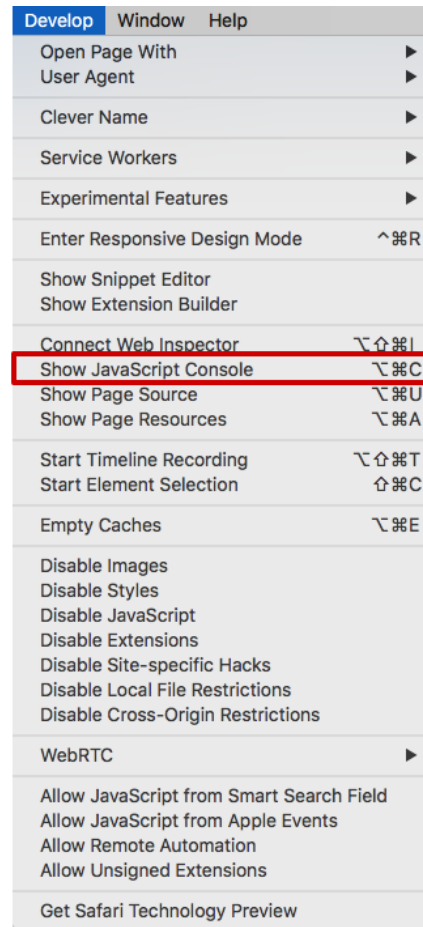

- [Apple Safari](#)
- [Google Chrome](#)
- [Microsoft Edge](#)
- [Microsoft Internet Explorer](#)
- [Mozilla Firefox](#)

# Apple Safari

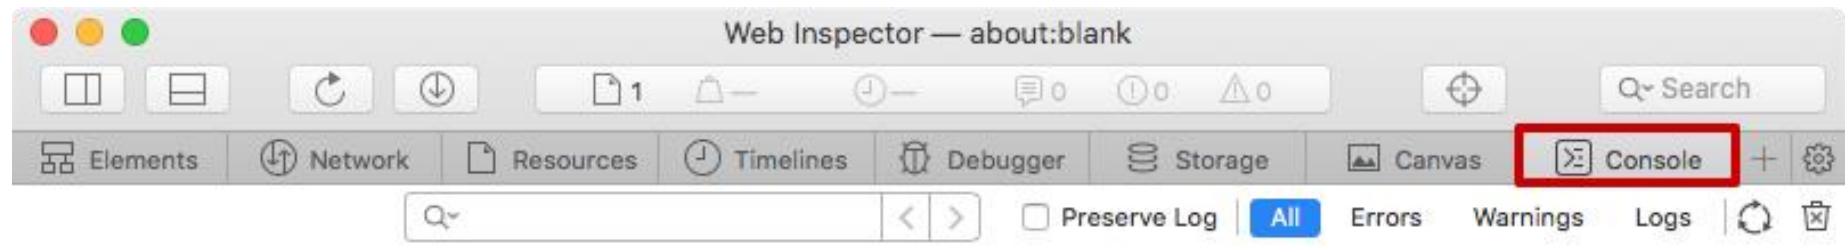

Before you can access the developer console in Safari, you first need to enable the **Developer Menu**. To do that, go into Safari's preferences (**Safari Menu > Preferences**) and select the **Advanced Tab**.

Once that menu is enabled, you will find the developer console by clicking on **Develop > Show Javascript Console**. You can also use the shortcut **Option + ⌘ + C**.

The console will either open up within your existing Safari window, or in a new window. It will automatically select the Console tab.

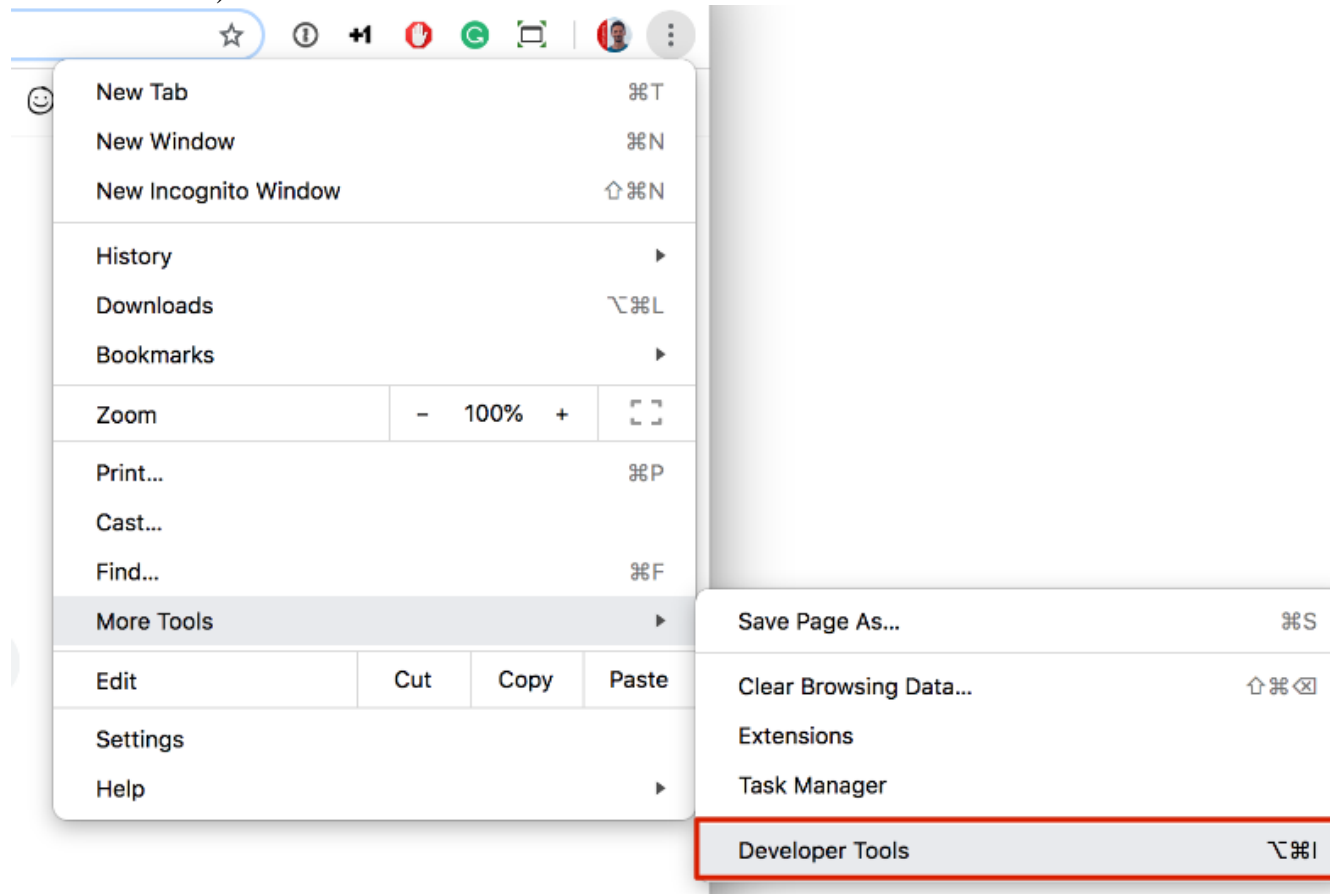

Console opened at 4:10:48 PM

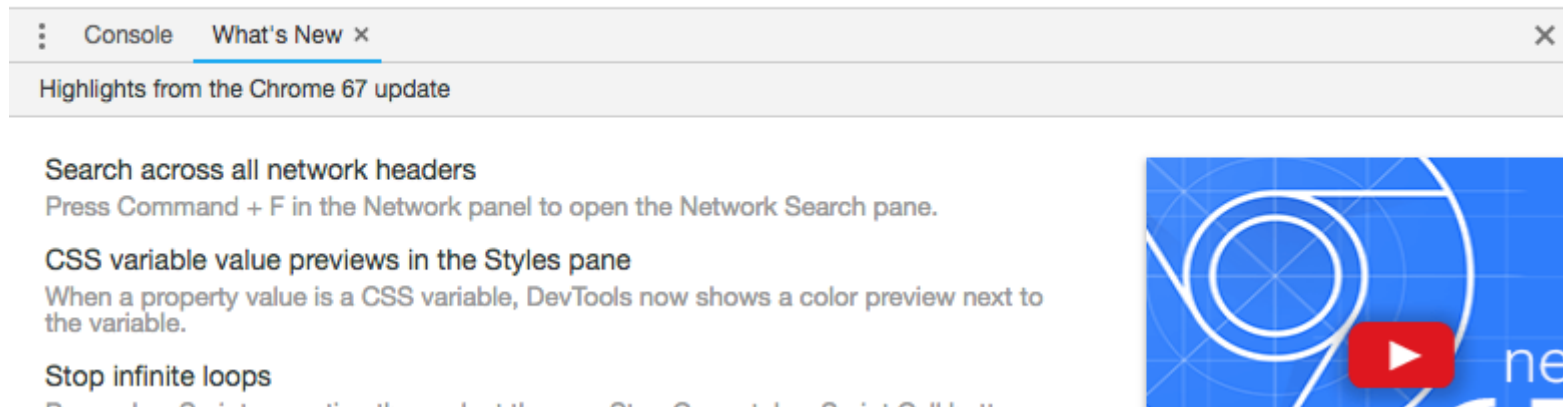

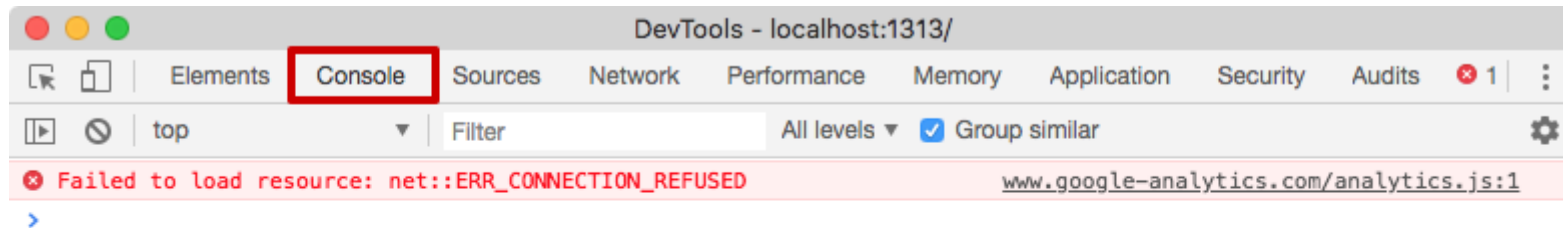

> |

# Google Chrome

To open the developer console in Google Chrome, open the **Chrome Menu** in the upper-right-hand corner of the browser window and select **More Tools > Developer Tools**. You can also use the shortcut **Option + ⌘ + J** (on macOS), or **Shift + CTRL + J** (on Windows/Linux).

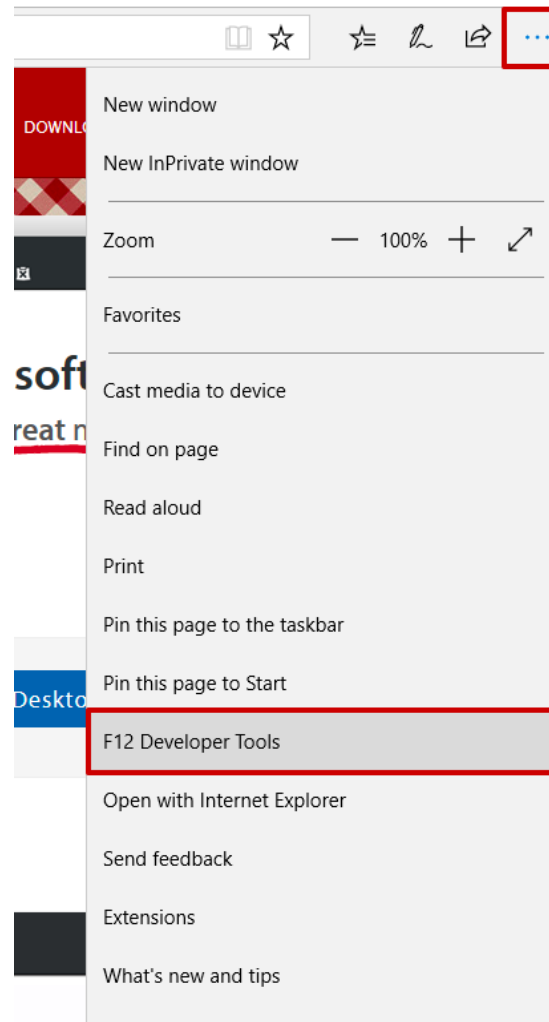

The console will either open up within your existing Chrome window, or in a new window. You may have to select the Console tab.

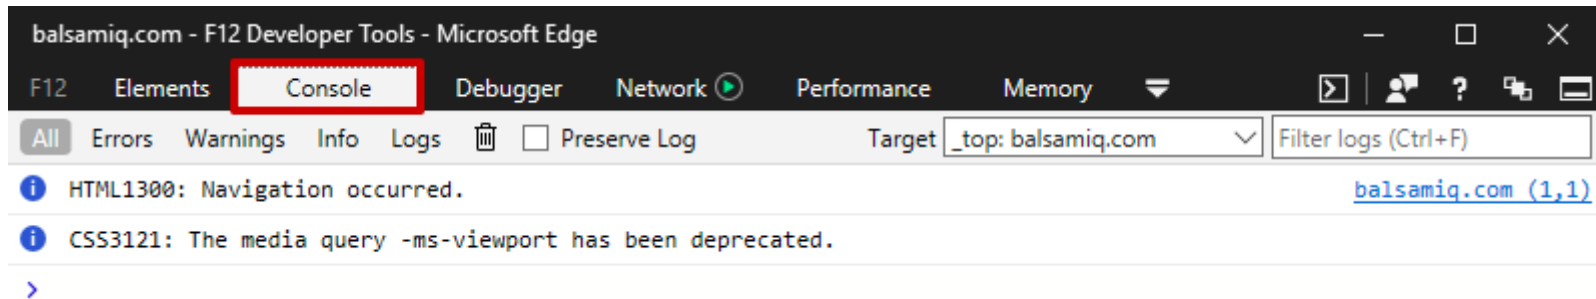

# Microsoft Edge

To open the developer console in Microsoft Edge, open the **Edge Menu** in the upper-right-hand corner of the browser window and select **F12 Developer Tools**. You can also press **F12** to open it.

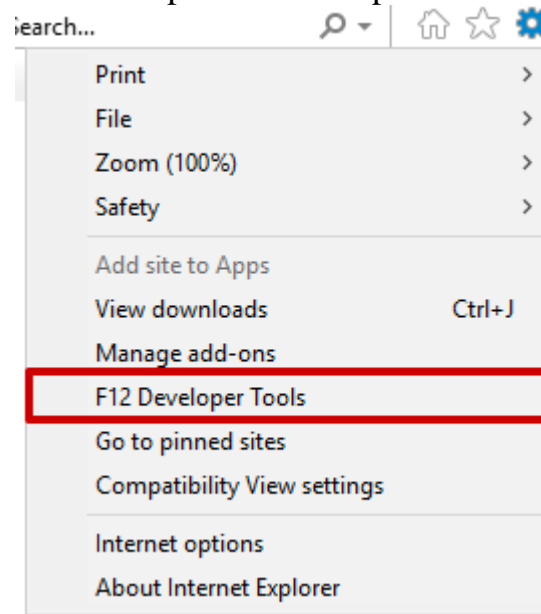

The console will either open up within your existing Edge window, or in a new window. You may have to select the Console tab.

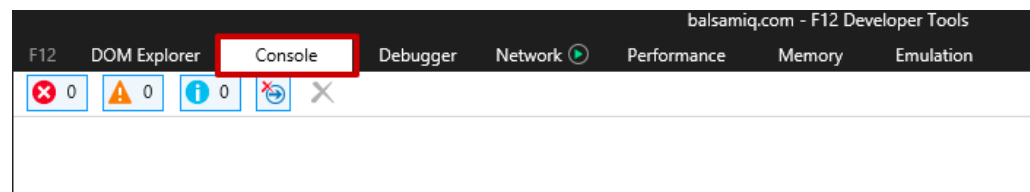

# Microsoft Internet Explorer

To open the developer console in Internet Explorer, click on the **Gear Menu** in the upper-right-hand corner of the browser window and select **F12 Developer Tools**. You can also press **F12** to open it.

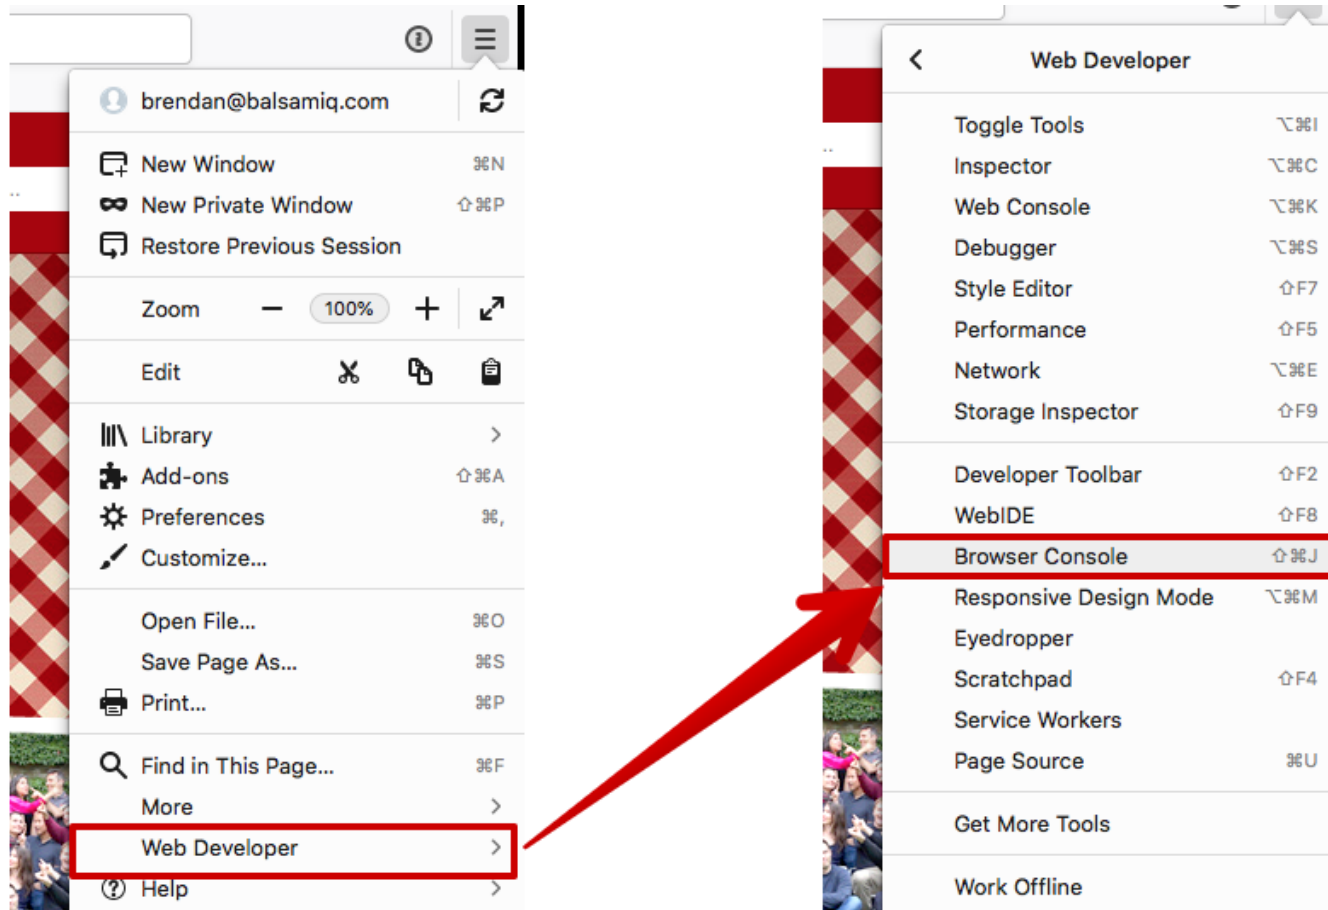

The console will either open up within your existing Internet Explorer window, or in a new window. You may have to select the Console tab.

# Mozilla Firefox

To open the developer console in Firefox, click on the **Firefox Menu** in the upper-right-hand corner of the browser and select **Web Developer > Browser Console**. You can also use the shortcut **Shift + ⌘ + J** (on macOS) or **Shift + CTRL + J** (on Windows/Linux).

The Browser console will open in a new window.
